---

Welcome to the first-ever Texas Sheep & Goat Raisers' Association Stockman's Sale!

We are privileged to work with some of the best commercial sheep and goat producers in the country. In this sale, you will find sires to suit any herd - from club-lamb style to range-flock friendly. Our producers stand behind their genetics and have production experiences spanning multiple generations.

As the largest sheep and goat membership-driven organization, we hope this sale provides an opportunity to provide more extensive genetics to buyers and showcase the high-quality sheep and goat operations in Texas.

Thank you for your interest and we look forward to seeing you March 15th!

TSGRA Board & Staff

# 2025 Texas Stockman's Sale

## Rules and Sifting Guidelines

The reasons behind the rules and sifting guidelines is to ensure the transfer of healthy, viable rams and billies to their new owners.

### Eligibility

- **Rams** will need to be at least 6 months of age and a minimum weight of 100 lbs at the time of the sale. Rams cannot be older than 24 months of age at the time of the sale. Teeth will be checked by the sifting committee and rams should not have more than 4 permanent bottom incisors, but it is acceptable if their I<sub>3</sub> incisors (3-year-old teeth) have erupted. Rams with 6 full permanent teeth will not be allowed.
- **Rams** will need to have a minimum scrotal circumference of 26 cm for lambs (under 1 year of age) and a minimum of 30 cm for yearlings and 2-year olds.
- **Billies** will need to be at least 6 months of age and a minimum weight of 75 lbs at the time of the sale. Billies cannot be older than 24 months of age at the time of the sale. Teeth will be checked by the sifting committee and rams should not have more than 4 permanent bottom incisors, but it is acceptable if their I<sub>3</sub> incisors (3-year-old teeth) have erupted. Billies with 6 full permanent teeth will not be allowed.
- **Billies** will need to have a minimum scrotal circumference of 22 cm for billy kids (under 1 year of age) and a minimum of 26 cm for yearlings and 2-year olds.
- All rams and billies must have an official scrapie tag in their ear at the time of unloading.
- All rams will need to have a negative ELISA test for *Brucella ovis* within 30 days prior to the sale date. Documentation **WITH COPIES** of **ALL B.**

**OVIS TESTING** will be required prior to unloading of rams. **IF ANY RAM IN THE TEST GROUP IS POSITIVE, NONE WILL BE SOLD.**

- It is not a requirement that the sires be shorn at all, but if they are shorn this needs to be done at **minimum 30 days** (at least 1 month regrowth is necessary) prior to the sale and with 13 tooth or 9 tooth combs. No slick shorn (fine or surgical blades) or fitted sires will be permitted.
- It is expected that sellers will provide a guarantee of their consignments. If a buyer in good faith deems an animal unsuitable or sterile, the consignor will replace or refund at comparable value.
- Upon purchase, the ram/billies become property of the buyer. However, in the event the buyer is not physically present at the sale, sellers will be responsible for maintaining possession of the lot until pickup can be arranged. It will be strongly suggested that online buyers arrange pickup of their purchase within 7 days unless otherwise arranged between buyer & seller.

### Timeline

- All Rams /Billies will need to be in their designated pens by 3:00 pm on Thursday so that the Health Sifting Committee can start inspections on time.
- All consignors will be responsible for the feed, water, and bedding in the pens. Shavings will be available on site for purchase.

### Sifting Guidelines

*\*To ensure that healthy, viable sires are sold, sifting will take place two days prior to the sale. All rams/billies will be examined for clinical signs of disease that could be detrimental to the long-term health and fertility. Final decision to sift will be at the discretion of the lead veterinarian. Sifted animals will be*

*removed from the sale and if the reasoning for the sift is contagious disease, these animals will not be allowed to stay on site.*

- Rams/Billies will be examined, and testicles palpated for abnormalities, swelling and other signs of potential injury or infection. Testicles will also be measured by the sifting committee.
  - Notably: a fertility test will not be required. Due to the “off-season” timing of this sale, reduced fertility at this time of year could be a result of normal seasonal reproductive patterns.
- Animals with contagious diseases will be sifted. Other sires in the same consignment may also be sifted at the discretion of the veterinarian if there is a significant risk of disease transmission.
  - Examples include but are not limited to:
    - Clinical signs of pneumonia/respiratory infection
    - Abscesses indicative of Caseous lymphadenitis
    - Active infections of the eye
    - Pizzle/sheath rot
    - Foot rot
    - Excessive diarrhea
    - Active soremouth
    - Severe external (lice, keds) or internal parasite infections (bottle jaw, severe anemia.
      - *It is strongly recommended that all sires be dewormed and treated for external parasites within 30 days prior to the sale.*
- Non-transmissible reasons for sifting:
  - Sires with severely over- or undershot jaws will be sifted.
  - Sires with rectal prolapse will be sifted.
  - Rams in poor body condition (less than 2.5) will be sifted.
  - Rams in excessively fat condition (4.5 or greater) will be sifted.

# IMPORTANT

## GROUP CHOICE

Each consignor will have the option to have 2 individual lots and the rest will be sold in group-choice format. Individual rams/billies will be sold as single lots.

For group choice lots, pairs or trios of rams/billies will be moved into the sale ring at one time and auctioned at a per head price. **The buyer with the winning bid will have the option to take one or all at that per head price. If the entire lot is not taken, then bidding will restart for the remaining sires.** The size of those groups will be determined by the sale committee.

# Watch the Sale on CCI.live!

The best, the fastest and most comprehensive marketing & bidding tool!

## How to Bid Online...

- As a **buyer**, you do not need an account or to login to watch the sale but you must have a validated account to bid.
- After you are logged in, you must proceed to the sale page for any and every auction and click **"Get Buyer Number."** Some auctions require a pass-code to obtain a buyer number even after you are approved by CCI.live. Pass codes generally come from the sale manager or ranch for that particular sale.
- CCI.live will operate with ease on a **cellular device, laptop, desktop or tablet.**
- A **modern or current browser** is important and will make your experience better. You do not need to install the app on cellular devices to watch a sale. CCI.live is a browser-based application meaning it will play on most new browsers, but you can also download the CCI.live app at the Apple App Store or through Google Play.
- **For successful bidding you must have good Internet service!** It is very important to be stationary. If you are driving and bidding, expect to have some service issues. If you are stationary on a good device, with healthy Internet, expect a very successful bidding environment. If you have slow Internet watch the "asking price" on the screen - it is real time and refresh your browser if you feel like you have some lag.
- **Support line open during all sales. 405-400-9505** - Please contact the ranches for invoices and trucking.

# Breeder Spotlight: Wayne Brown

I have been raising a commercial flock of purebred Angoras for over 15 years with my foundation breeding program from Ross and Speck herds.

Targeting for not only **fineness** but also for **structural correctness** and **hardiness** for the rough, rocky and brushy environment that they live in.

I have participated in the last couple of years in the Texas A&M Agrilife Angora Pasture Performance Test which helps guide me in the direction of my breeding program.

Wayne & Shannon Brown

# Breeder Spotlight: Drennan Sheep Co.

Drennan Sheep Company is a joint family operation between Brent & Mitzi Drennan and Cade & Kaylee Nobles. We have been involved in the sheep business for over 60 years with Finewool type sheep and transitioning to Dorpers in 2016.

Our flock has grown to over 100 registered mature ewes. Our daughters grew up and were raised in the sheep pen and now our grandchildren are showing breeding sheep across the state. Brynlee, our oldest grandchild, has had great success exhibiting the Supreme Champion Ram in Fort Worth the past 4 years!

**\*Our consignments will all be sired by the ram pictured.**

*I began my sheep and goat ranching business as a 4-H Club member over 65 years ago. As a retired County Agricultural Agent, I found my passion in raising Dorpers. All of my purebreds are at least 97% Dorper. My purebreds are consistently more productive, better mothers and perform better on the range.*

*My sheep are run on the range with 20% molasses tubs in front of them year-round. I lamb in the pasture and only bring those to the house that have been cosigned to shows or sales. We exhibit many of our sheep at the major livestock shows and we have been blessed to be very competitive over the years. -Preston Faris*

*I have been involved in the goat business for many years with Angora goats, Boer goats and a breed which I developed myself over 20 years ago that I call Americanas. These goats are 5/8 Spanish and 3/8 Boer.*

*My goal was to develop a goat with the toughness of the Spanish that is an aggressive grazer, a good mother, a consistent producer that would perform on our semi-arid range conditions in Sutton County. I also wanted to inject a bit more growth and muscle without giving up the performance traits. Selection efforts center on structural soundness, good udder and teat structure and bold skeletons with muscle. -Preston Faris*

## Breeder Spotlight: Oak Hill Ranch

Growing up, Chacho Cahill's family raised Angora goats and his father, Jimmy Cahill was involved in not only raising Angora goats, but marketing products made from mohair worldwide.

With advice and encouragement from Wesley Glass, the Cahills bought 3 of the best white dorper ewes. And so began Oak Hill Ranch. With an intense flushing program using some of the highest quality white dorper rams, and a heavy influence from Wildcat Ranch and N&K genetics, the sheep were recognized as some of the best.

Over the years, they have stayed true to the purpose and function of the white dorper breed and tried to keep their sheep **muscular** and **well-balanced** with **deep bodies** and **functional front ends**. Recently, collaborations with Ruffin Ranch have helped to sustain the quality and enhance the genetic diversity of their flock.

**Chacho & Dawn Cahill**

Comments: Excellent combination of parasite resistance and prolificacy.			

# Breeder Spotlight: Bull Creek Ranch

Bull Creek Ranch is a diverse, commercial sheep and goat operation in Sterling, Glasscock, and Mitchell Counties. The sheep base are Glass family Ramboulets that have thrived here for over 100 years, highlighting fertility and fleece quality. In 2016, the ranch added a separate flock of easy fleshing **White Dorper ewes**, and **Katahdin rams** are crossed to add parasite **resistance, fertility** and **hybrid vigor**.

Finally, Spanish Goats integrate a nice range management tool to complement the grazing habits of the sheep. Managed by Baylor Walker and Wesley Glass—strict culling is part of the management plan to achieve **fertility, performance**, and **docility** in the flocks.

**Sterling, Glasscock,  
Mitchell Counties**

# Breeder Spotlight: Wildcat Ranch

Wildcat Ranch is a purebred White Dorper and Dorper operation in Sterling City, Texas. The flock is owned and managed by Wesley and Ashley Glass. Their kids show their home raised sheep across the country.

Top quality livestock is expected at the Wildcat, with the emphasis on **skeletal build, meat production**, and a **good temperament**. However, the sheep are also expected to perform on their own in the pasture the way God intended for them to. Maternal traits of the ewes and **functionality** in the rams are fundamental.

**Wesley & Ashley  
Glass**

# Breeder Spotlight: Hodges Livestock

Hodges Livestock is owned and operated by Kade and Morgan Hodges, in Sterling City, Texas. Our mission is to be good stewards of God's creation while raising productive and profitable livestock for both consumers and fellow ranchers.

We specialize in raising commercial Royal White hair sheep, known for their **productivity, hardiness, and profitability**. Our sheep blend **performance and carcass traits** with **hardiness, maternal skills**, and parasite resistance. Hodges Family Royal White genetics have been sent to 25 states nationwide.

*The Hodges Family has been raising livestock in Sterling County since 1889 and first branched into the sheep industry in 1907. Hair sheep were brought to the ranch in the late 1990's by Clinton Hodges and his son, Wesley.*

## Breeder Spotlight: N&K Ranches

N & K Ranches is located in Eldorado, Texas, some 55 miles south of San Angelo, Texas. The ranch produces Boer goats, White Dorper, Dorper and Red Angus cattle. The family has been in the sheep and goat industry since the Kohls family raised Delaine and Mohair goats in Boerne, Texas.

Norman is a stockman who is very well versed in **selection** and **breeding**. The ranch has produced many Champion and Reserve Champions at many stock shows and breeding sheep events. The **prodigy** on the ranch has added to the **genetic base** of both the Boer Goats and the Dorper industry. Look for our consignments in both the Boer Goats and the White Dorsers. We appreciate the effort of the TSGRA promoting this sale.

**Eldorado, Texas**

<b>Birthdate:</b>	3/29/2023	<i>1.46 PWW EBV</i>	
<b>Birth Type:</b>	SINGLE		
<b>Comments:</b>	Low parasite load with great WW EBV. Ram is sired by a Taes ram that goes back to a Lafeldt ram.		

## Breeder Spotlight: Kott Rambouillets

The Kott family has been raising wool sheep in the Texas Hill Country since the early 1940s. We have always concentrated on producing excellent wool, as well as **structurally correct, functional, moderately-framed sheep**.

Production records are available as our flock is enrolled in the NSIP program, as well as, being a GEMS innovator flock. We have **genetically enhanced performance-backed EPSs** on **wool** and **growth rates** as well as **fecal count data**.

The ranch is centrally located in Fredericksburg, Texas.

**Comments:** We raise rams by the specs needed for the commercial breeder: good feet, structural soundness, parasite resistance, holds weight when out on sub-standard pastures with ewes, have a little wool blanket on top for protection from sun/flies.

**Mason & Sutton  
Counties**

# Pfluger Hill Country Ranch Co.

Pfluger Hill Country Ranch Co., LLC (PHCRCo) operates a cattle, sheep, and goat ranching operation in Mason and Sutton Counties. Bob Pfluger has continued the family's Rambouillet sheep tradition over the last 30 years with the bloodlines that his father, Robert L. Pfluger, and grandfather, Walter L. Pfluger, worked hard to improve since the 1940's.

**Fine wool** and **long staple length** have always been a center piece of the breeding program. High performing sires were purchased for many years at the TAMU Rambouillet Performance Test Sale to steadily improve the flock's genetics. Beginning in 2017, PHCRCo's flock was enrolled in the National Sheep Improvement Program (NSIP) to track parentage and performance data with Estimated Breeding Values (EBV's). Although PHCRCo is still in the early stages with its NSIP data, it has provided a stronger focus on a broader base of genetic characteristics such as **fertility** and **worm resistance**, in addition to **growth** and **wool characteristics**. PHCRCo's goal is to produce **durable sires** for Texas sheep producers who are looking for growth and fertility while improving the overall fine wool characteristics of their sheep herd.

**-Bob Pfluger**

<b>Class:</b>	22 MO	<i>HAIR, NO WOOL</i>
<b>Tag:</b>	ROCKING R 2318	<i>GOOD FEET AND LEGS</i>
<b>Birthdate:</b>	5/23/2023	<i>FULLBLOOD</i>
<b>Birth Type:</b>	TWIN	

**Comments:** Functional. This ram has been living in harsh conditions. Both parents are Type 5 conformation 5 by S. African inspectors. Sire has a full genetic panel at Flock 54. RR scrapies resistance. Big, heavy ram. Huge rib tons of meat. Dam was one of our top show ewes who left the ring and went directly into production.

<b>22</b>	ROYAL WHITE RAM	<b>RUFFIN RANCH</b> Brady, Texas
	Individual lot	

<b>Class:</b>	14 MO	<i>EASY FLESHING</i>	<i>WW: 71 LBS</i>
<b>Tag:</b>	ROCKING R 2463	<i>CALM, GENTLE NATURE</i>	<i>SHOW RAM</i>
<b>Birthdate:</b>	1/12/2024	<i>LOW BW: 6.2 LBS</i>	
<b>Birth Type:</b>	TWIN	<i>HAIR, NO WOOL</i>	

**Comments:** This ram's mother has produced the Grand Champion and/or Reserve Grand Champion ram at the Houston Livestock Show, Gillespie Co. Show and Chisholm National Show for the last 3 years. This is old Royal white foundation bloodline.

## Breeder Spotlight: Ruffin Ranch

The Ruffin Ranch has been in the sheep industry for 140 years. We have always been focused on animals that thrive in harsh conditions. Producing commercial rams that last for years for the buyers with **good feet and legs, lots of meat distribution, fat layer under the skin, solid hide, hair** and a **docile character** are a few of the requirements to make it to the ram ranch.

We have enjoyed a lot of success in the show ring with multiple National Champions. But those sheep have to make it on the ranch—just like the rest of the flock.

We take biosecurity seriously. The entire flock is Johne's free. Detailed records are stored on each animal. We are Royal white and White Dorper enthusiasts!

**Brady, Texas**

# Breeder Spotlight: Sisco Ranching Co.

Our family has been ranching in Water Valley for over 100 years, raising sheep and cattle along the North Concho River and surrounding areas. We have been raising and selling commercial white Dorper bucks and ewe lambs for over 10 years.

Barney Sisco bought his first set of ewe lambs from Colby Frizzell and his bucks from Wesley Glass of Sterling City, and we are committed to improving our herd through breeding and herd management.

Our goal is to raise **high quality** bucks and ewe lambs that can provide **genetic diversity**, **structural integrity**, and **ruggedness** to producers' herds across the state.

**Trey & Jennifer Sisco**  
**Ty & Lindsey Sisco**

# Breeder Spotlight: Vinson Ranch

Duwain and I have been raising sheep and cattle our entire lives. Against wool buyers' advice, we started putting Dorper/Croix Rams on our Rambouillet ewes in 1999. By 2008, we told the shearers not to come back. In 2016, Bill Hoag certified our Dorper/Croix ewes as foundation Royal Whites. Since then, we have raised seedstock and have shipped internationally, as well as many different states.

These rams are American Whites by Australian White ram out of Royal White ewes. Royal Whites are known for their **disease and parasite resistance, easy care, excellent mothering instincts, hardiness, year-round breeders, high lamb survivability** and **tender meat**. The American White adds a **heavier bone and thicker muscle**.

We bet you will be pleased with their offspring!

The 10 Rambouillet rams are hardy and adapted to a west Texas environment, they were all born and raised on pasture, but furthermore have genetic merit for other traits that we believe positively impacts their future productivity. In our Rambouillet flock, prolificacy, parasite resistance, and wool quality are all traits we collect extensive records on to develop estimated breeding values for accurate genetic selection and we hope you find the included data on these rams helpful in your purchasing decisions.

While marketing seedstock is not the primary mission of our center, we are still proud of the livestock we have produced through our genetics research programs, and believe they can have a positive impact in many other flocks and herds.

Funds from these sales go directly back to support our livestock management, research efforts and extension education. We would love to visit with you further about how any of these rams or billies, or any of the sires from the excellent lineup of seedstock flocks and herds consigning to this sale, can help your operation.

<b>60</b>	SPANISH BILLIES	TEXAS A&M AGRILIFE RESEARCH San Angelo, Texas
	Pen of 2 (2 of 2)	
Class: 2-YO		
Tag: 23169		
Birthdate: MARCH 2023		
Comments: From the high cedar eating herd (selected to consume ~25% more cedar than other goats). Born, raised and developed on pasture.		

The meat goat billies have been selected from our 'Aggie Cedar Eater' (ACE) herd that is managed at the Sonora Experiment station, where many years of quantitative genetic selection for browsing cedar has been a priority. As a result, these goats have the physiological capabilities to consume 25-50% more cedar as a part of their natural diet.

## Breeder Spotlight: Hengst-Hoff Ranch

Hengst-Hoff ranch is a commercial livestock operation based in Eldorado, Texas. The ranch raises beef cattle and Spanish goats along with Finewool Rambouillet sheep. Registered Waldrop and ASU sires make up the foundation of the Hengst-Hoff flock.

We take pride in producing herd fleece **average of 20 microns**. Breeding rams are selected for **meat, conformation, wool quality, and hardiness**. Furthermore, these rams have to be able to survive the diverse terrains and conditions of Schleicher County without falling apart. These rams were selected for this sale because of their **genetic prowess, hardiness** and the **longevity** we all look for. These rams were born in March of 2024 and weaned in August of 2024. This fine Rambouillet stock will be a great addition to any wool program.

Our livestock is out of proven and registered sires. We have improved genetics and our end goal is to make the best product we can. We are offering a group of bucks that were hand-selected and rigorously inspected to ensure that we are offering a product that we ourselves would want. Their lineage has done great for us on the ranch.

**Do not miss out on this opportunity to improve your herd productivity and quality!**
